Zukünfte Elke Seefried 2015-07-01 Zukunft avancierte in den westlichen Industriegesellschaften der 1950er bis 1970er Jahre zu einer zentralen wissenschaftlichen und

politischen Kategorie. Im Zuge dessen formierte sich eine neue Wissenschaft - die Zukunftsforschung. Mit der preisgekrönten Studie von Elke Seefried liegt die erste Gesamtdarstellung zum Thema vor. Seefried zeigt, wie die "westliche" Zukunftsforschung aus dem Systemwettbewerb des Kalten Krieges und der Überzeugung gerann, "Zukünfte" voraussagen und steuern zu können. Plastisch werden die Denkstile von Zukunftsforschern wie Daniel Bell, Herman Kahn oder Robert Jungk, transatlantische Netzwerke und die ambivalente Rolle der Zukunftsforschung in der politischen Planung herausgearbeitet. Einen Höhepunkt erreichte die Zukunftsforschung um 1970, als sie einen globalen Krisendiskurs um die "Grenzen des Wachstums" anfachte. Schließlich erklärt das Buch, warum die Zukunftsforschung im Lauf der 1970er Jahre selbst in eine Krise geriet. Elke Seefried wurde 2014 für diese Studie mit dem Carl-Erdmann-Preis des Verbandes der Historiker und Historikerinnen Deutschlands für herausragende Habilitationsschriften ausgezeichnet.

Energy Balances and Electricity Profiles 2008 United
Nations 2011 This Report contains energy balances for
about 115 developing countries, showing energy
production, trade, conversion and consumption for each
fuel used in the country, as well as electricity
profiles for about 190 countries, providing detailed
information on production trade and consumption of
electricity, net installed capacity and thermal power
plant input for selected developing and developed
countries. This publication is bilingual (English and
French).
