Cash Flow and Corporate Finance in Victorian Britain T. J. Baldwin 2000 This monograph presents a methodology based on the concept of cash flow and produces, in tabular form, annual cash flow statements for a sample population of twenty companies in coal, iron and steel from their respective formation dates to 1914. For the benefit of the non-accountant, a detailed example showing the means by which these figures are derived is included, together

with an analysis of the development of the financial reporting process through the second half of the nineteenth century. The book adds a new dimension to the analysis of corporate performance over a long period and offers a valuable database which will facilitate further research. It is an unusual and useful collaboration between accounting historians and economic historians.

International Financial Statistics, April 2017 International Monetary Fund. Statistics Dept. 2017-03-31 This paper provides notes to the country tables in the monthly issues provide information about exceptions in the choice of the consumer price index and the period average exchange rate index. For a relatively small number of countries, notes in the country tables in the monthly issues indicate where alternative price indices, such as the wholesale/producer price index or a weighted average of several price indices, are used; where data constraints have made it necessary to use weighting schemes based on aggregate bilateral non-oil trade data; and where trade in services (such as tourism) has been taken into account. When a country joins the IMF, it is assigned a quota that fits into the structure of existing quotas. Quotas are considered in the light of the member's economic characteristics, and taking into account quotas of similar countries. Quotas are reviewed at intervals of not more than five years. The reviews take account of changes in the relative economic positions of members and the growth of the world economy.
