IFS Supplement on Monetary and Financial Statistics International Monetary Fund. Statistics Dept. 2008-03-31 This paper discusses the report on International Financial Statistics (IFS) Supplement on Monetary and Financial Statistics. Issued in three parts, this annual publication contains balance of payments and international investment position data. Part 1 of this report provides detailed tables on balance-of-payments statistics for approximately 171 countries and international investment position data for 111 countries. Part 2 of this quarterly report presents tables of regional and world totals of major balance-of-payments components. Part 3 of this IFS report contains descriptions of methodologies, compilation practices, and data sources used by reporting countries. Quarterly issues of this publication provide, for 158 countries, tables with current data (or estimates) on the value of imports from and exports to their most important trading partners. In addition, similar summary tables for the world, industrial countries, and developing countries are included. The Statistics Department of the Fund is pleased to make available to subscribers the IFS database through an easy-to-use online service.

International Financial Statistics, December 2015 International Monetary Fund.

Statistics Dept. 2015-12-01 This December 2015 issue of International Financial Statistics is a standard source of statistics on all aspects of international and domestic finance. The monthly printed issue of IFS reports current monthly, quarterly, and annual data, while the yearbook reports 12 observations of annual data. Most annual data on the CD-ROM and Internet begin in 1948; quarterly and monthly data generally begin in 1957; most balance-of-payments data begin in 1970. A nominal effective exchange rate index represents the ratio of an index of a currency's period-average exchange rate to a weighted geometric average of exchange rates for the currencies of selected countries and the euro area. When a country joins the IMF, it is assigned a quota that fits into the structure of existing quotas. Quotas are considered in the light of the member's economic characteristics and considering quotas of similar countries.

Government Finance Statistics Yearbook, 2012 International Monetary Fund. Statistics Dept. 2013-03-19 The demand for high quality detailed public finance statistics covering a globally representative sample of countries has increased dramatically during the recent financial crisis. Due to the complexity of public finance statistics, however, such data tend to be either available in oversimplified high level aggregates and lacking in methodological transparency, or, available with a great level of detail and a unified methodological approach yet overly complicated to understand. The IMF's Government Finance Statistics Yearbook shows fiscal data of around 140 countries following the Government Finance Statistics Manual 2001 framework. The associated database includes data series covering over an almost 40 year period. The IMF's Statistics Department embarked on several initiatives to improve its accessibility.
