National Accounts of OECD Countries, Financial Balance Sheets 2014 OECD 2015-05-04 This volume includes data on financial stocks by institutional sector and by financial instrument.

International Financial Statistics, January 2011 International Monetary Fund. Statistics Dept. 2010-12-29 The IMF's principal statistical publication, International Financial Statistics (IFS) Online, is the standard source of international statistics on all aspects of international and domestic finance. For most countries, IFS Online reports data on balance of payments, international investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government accounts, national accounts, and population. Updated monthly.

International Financial Statistics, October 2016 International Monetary Fund. Statistics Dept. 2016-09-30 This October 2016 issue of International Financial Statistics (IFS) is a standard source of statistics on all aspects of international and domestic finance. This issue presents countries newly reporting monetary data for Rwanda using the standardized report forms. Exchange rates in IFS are classified into three broad categories, reflecting the role of the authorities in determining the rates and/or the multiplicity of the exchange rates in a country. Although the method of calculating the US dollar/SDR exchange rate has remained the same, the currencies' number and weight have changed over time. Their amount in the SDR basket is reviewed every five years. When a country joins the IMF, it is assigned a quota that fits into the structure of existing quotas. Quotas are considered in the light of the member's economic characteristics and considering quotas of similar countries.

Economic and financial issues in the post-covid-19 world: Implications and role of public health Giray Gozgor 2023-02-13

International Financial Statistics Yearbook, 2000 International Monetary Fund. Statistics Dept. 2000-09-13 The International Financial Statistics Yearbook, usually published in September, contains available annual data covering 12 years for countries appearing in the monthly issues of IFS. The IFS service is the standard source of international financial statistics. Additional time series in country tables and some additional tables of area and world aggregates are included in the Yearbook.

Innovative Technology at the Interface of Finance and Operations Volodymyr Babich 2022-01-01 This book examines the challenges and opportunities arising from an assortment of technologies as they relate to Operations Management and Finance. The book contains primers on operations, finance, and their interface. After that, each section contains chapters in the categories of theory, applications, case studies, and teaching resources. These technologies and business models include Big Data and Analytics, Artificial Intelligence, Machine Learning, Blockchain, IoT, 3D printing, sharing platforms, crowdfunding, and crowdsourcing. The balance between theory, applications, and teaching materials make this book an interesting read for academics and practitioners in operations and finance who are curious about the role of new technologies. The book is an attractive choice for PhD-level courses and for self-study.

Summary of State Government Finances in ... 1944

Finance Australia. Commonwealth Bureau of Census and Statistics 1968

International Financial Statistics, January 2019 International Monetary Fund. Statistics Dept. 2019-01-04 This January 2019 monthly issue of International Financial Statistics (IFS) contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community, Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union, the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African Economic Monetary Union, West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis. Exchange rates in IFS are classified into three broad categories, reflecting the role of the authorities in determining the rates and/or the multiplicity of the exchange rates in a country. The three categories are the market rate, describing an exchange rate determined largely by market forces; the official rate, describing an exchange rate determined by the authorities—sometimes in a flexible manner; and the principal, secondary, or tertiary rate, for countries maintaining multiple exchange arrangements.

International Financial Statistics, January 2018 International Monetary Fund. Statistics Dept. 2017-12-28 International Financial Statistics, January 2018

Finance and Sustainable Development Magdalena Ziolo 2020-12-28 There are many studies confirming the relationship between financial systems and economic development, but there are few which examine the degree to which financial systems a) impact the quality of information, b) influence sound corporate governance, c) ensure effective mechanisms of risk management, d) mobilize savings and f) facilitate trade. In the context of sustainability, there should also be a line of inquiry into how a particular financial system influences the assurance and implementation of sustainable development principles and goals. This book delivers a methodological approach to designing and assessing sustainable financial systems. It provides an original contribution by prioritizing ESG factors in the decision-making process of financial institutions and identifying their impact on sustainable financial systems. The author argues that to achieve financial stability, it is necessary to have in place mechanisms designed to prevent financial problems from becoming systemic and/or threatening the stability of the financial and economic system, while maintaining (or not undermining) the economy's ability to sustain growth and perform its other functions. The book primarily takes a simulation and experimental approach. It is the first book to take such a comprehensive look at sustainable financial systems as opposed to sustainable finance in general. It will appeal to academics, students and researchers in the fields of economics, finance and banking, business, management and political and social sciences.

International Financial Statistics, December 2018 International Monetary Fund. Statistics Dept. 2018-12-19

International Financial Statistics, Database & Browser, December 2018

Building Resilience in Developing Countries Vulnerable to Large Natural Disasters International Monetary Fund. Strategy, Policy, & Review Department 2019-06-26 This paper discusses how countries vulnerable to natural disasters can reduce the associated human and economic cost. Building on earlier work by IMF staff, the paper views disaster risk management through the lens of a three-pillar strategy for building structural, financial, and post-disaster (including social) resilience. A coherent disaster resilience strategy, based on a diagnostic of risks and cost-effective responses, can provide a road map for how to tackle disaster related vulnerabilities. It can also help mobilize much-needed support from the international community.

OECD Business and Finance Outlook 2015 OECD 2015-06-24 This new Outlook on finance and investment presents unique data, analysis and instruments, looking at what might affect and change tomorrow's world of business finance and investment.

PISA 2018 Results (Volume IV) Are Students Smart about Money? OECD 2020-05-07 The OECD Programme for International Student Assessment (PISA) examines what students know in reading, mathematics and science, and what they can do with what they know. This is one of six volumes that present the results of the PISA 2018 survey, the seventh round of the triennial assessment. Volume IV, Are Students Smart about Money?, examines 15-year-old students' understanding about money matters in the 20 countries and economies that participated in this optional assessment.

International Financial Statistics, April 2011 International Monetary Fund. Statistics Dept. 2011-04-01 The IMF's principal statistical publication, International Financial Statistics (IFS) Online, is the standard source of international statistics on all aspects of international and domestic finance. For most countries, IFS Online reports data on balance of payments, international investment position, international liquidity, monetary and financial statistics, exchange rates, interest rates, prices, production, government accounts, national accounts, and population. International Financial Statistics, September 2016

International Financial Statistics, December 2017 International Monetary Fund. Statistics Dept. 2017-12-04 This paper describes the country, euro area, and world tables that provide measures of effective exchange rates, compiled by the IMF's Research Department, Statistics Department, and area departments. A nominal effective exchange rate index represents the ratio of an index of a currency's period-average exchange rate to a weighted geometric average of exchange rates for the currencies of selected countries and the euro area. A real effective exchange rate index represents a nominal effective exchange rate index adjusted for relative movements in national price or cost indicators of the home country, selected countries, and the euro area. For ease of comparison between the nominal effective exchange rate index and the real effective exchange rate index, the average exchange rate expressed in terms of US dollars per unit of each of the national currencies is also given in the index form, base 2010 = 100.

Peer Review of the Automatic Exchange of Financial Account Information 2022 OECD 2022-11-09 This report presents the latest conclusions of the peer reviews of the legal frameworks put in place by each jurisdiction to implement the AEOI standard. The results relate to the more than 100 jurisdictions that committed to commence AEOI by 2020.

Green Finance for Sustainable Global Growth Tsai, Sang-Bing 2019-01-22 Businesses working under green finance models consider the potential environmental impact in investment and financing decisions and merge the potential return, risk, and cost correlated with environmental conditions into day-to-day financial business. Under this model, the ecological environment and sustainable development of society is observed and promoted. Green Finance for Sustainable Global Growth is an essential reference source that discusses emerging financial models that focus on sustainable development and environmental protection including developing trends in green finance, internet finance, and sustainable finance. Featuring research on topics such as competitive financing, supply chain management, and financial law, this book is ideally designed for accountants, financial managers, professionals, academicians, researchers, and students seeking coverage on the sustainable development of the finance industry.
