Behavioral Finance Rolf J.

Daxhammer 2023-01-30 Over the last 50 years, neoclassical financial theory has been dominating our perception of what is happening in financial markets. It has spurred numerous valuable theories and concepts all based on the concept of Homo Economicus, the strictly rational economic man. However, humans do not always act in a strictly rational

manner. For students and practitioners alike, our book aims at opening the door to another perspective on financial markets: a behavioral perspective based on a Homo Oeconomicus Humanus. This agent acts with limited rationality when making decisions. He/she uses heuristics and shortcuts and is prone to the influence of emotions. This sounds familiar in real life and can be transferred to what happens in financial markets, too.

Contemporary Issues in Financial Reporting Paul Rosenfield 2006-04-18 With the collapse of Enron and other similar scandals, financial reporting and its relation to corporate governance has become a contentious issue. In this revealing book, author Paul

Rosenfield involves the reader in exploring contemporary financial reporting and skilfully highlights the deficiencies in current methods. In doing so it provides a user-oriented guide to the salient issues which affect all aspects of financial accounting. Contemporary Issues in Financial Reporting challenges the reader to critically think through the issues and arguments involved in the practice of financial reporting. It goes to the heart of the most difficult and controversial problems, investigating the major issues and commenting upon the solutions offered in financial reporting literature. The grave defects in current accepted accounting principles are demonstrated and exposed, and alternative solutions are offered. Written by a former Secretary General of the International Accounting Standards Committee, practitioners and accounting scholars alike will find this volume to be an essential addition to their libraries.
