Statistics Dept. 2017-05-31 This paper explores International Financial Statistics (IFS) that contains country tables for most IMF members, as well as for Anguilla, Aruba, the Central African Economic and Monetary Community (CEMAC), Curaçao, the currency union of Curaçao and Sint Maarten, the Eastern Caribbean Currency Union (ECCU), the euro area, Montserrat, the former Netherlands Antilles, Sint Maarten, the West African Economic Monetary Union (WAEMU), West Bank and Gaza, and some non-sovereign territorial entities for which statistics are provided internationally on a separate basis. All trade figures in IFS are converted from national currency values to US dollars and from US dollar values to national currency. The country tables, euro area tables, and world tables provide measures of effective exchange rates, compiled by the IMF's Research Department, Strategy, Policy, and Review Department, Statistics Department, and area departments. For manufactured goods, trade by type of good and market is distinguished in the database. So it is possible to allow at a disaggregated level for competition among various exporters in a foreign market (i.e., third-market competition) as well as that arising

Trauma To Triumph: Rising From The Ashes Of The Asian Financial Crisis

Hoe Ee Khor 2022-05-12 This book takes stock of and analyzes the events during the Asian financial crisis (AFC) and subsequent developments, including the global financial crisis (GFC), that led to the development of the ASEAN+3 regional financial cooperation framework and the establishment of the ASEAN+3 Macroeconomic Research Office. The book is the first of its kind to compile comprehensive recollections of the major players during the AFC and the GFC, including country-level narratives on the causes and developments of the crises, and measures to

overcome them. The book not only presents an analytical and deeper examination of country experiences during both crises, but also assesses the two crises and covers the lessons learnt from the crises, particularly with a focus on the development of regional financial cooperation. The book concludes with regional financial cooperation in retrospect, aiming to catalyze further discussions on the direction of the region's financial cooperation.

The Sources of Social Power: Volume 4, Globalizations, 1945–2011

Michael Mann 2012-12-28 Distinguishing four sources of power – ideological, economic, military and political – this series traces their interrelations throughout human history. This fourth volume covers the period from 1945 to the present, focusing on the three major pillars of post-war global order: capitalism, the nation-state system and the sole remaining empire of the world, the United States. In the course of this period, capitalism, nation-states and empires interacted with one another and were transformed. Mann's key argument is that globalization is not just a single process, because there are globalizations of all four sources of social power, each of which has a different rhythm of development. Topics include the rise and beginnings of decline of the American Empire, the fall or transformation of communism (respectively, the Soviet Union and China), the shift from neo-Keynesianism to neoliberalism, and the three great crises emerging in this period – nuclear weapons, the great

recession and climate change.
