2020-11-25 The task of
structuring information on
built environment has
presented challenges to the
research community,
software developers and the
industry for the last 20
years. Recent work has
taken advantage of Web and
industry standards such as
XML, OWL, IFC and STEP.

Another important
technology for the
fragmented AEC industry is
digital communication.

Wired or wireless, it brings
together architects,
engineers and construction
site workers, enabling them
to exchange information,
communicate and work

together. Virtual enterprise
organization structures,
involving mobile teams over
distance, are highly
compatible with the needs
of the construction industry.
