Air Transport - A Tourism Perspective Anne Graham

2019-02-15 Air Transport: A Tourism Perspective provides rigorous insights into the current complexities, synergies and conflicts within air transportation and tourism, presenting a balanced, comprehensive, contemporary, and global analysis that thoroughly examines the links between theory and practice. The book offers readers a multi-sector, global perspective on the practical implications of the link between air transport and tourism. By using a novel approach, it systematically explores the successive stages of a tourist's trip-investigating reasons for flying, the airport experience, airline industry structures, competition and regulation, and air transportation and destination interrelationships. In addition, the book explores current and salient debates on such issues as the influence of traveling to visit friends and family, the role of charters versus low cost carriers, public subsidies to support airport development, and much more. Presents insights from an international team of expert contributors with proven research and publication experience in their specialty area Includes cutting-edge analyses based on original research that identifies emerging research directions and policy and managerial implications Utilizes a multidisciplinary approach to fully explore theoretical and policy concepts and their effect on air transportation and tourism development Provides case studies from around the globe in each chapter

Het theater van de straat Antoon Vrints 2011 Geweld in

de stedelijke publieke ruimte roept veel onbehagen op.

Verontruste stemmen zijn het erover eens dat het er in

Europese steden tegenwoordig een stuk gewelddadiger aan

toe gaat dan in het nabije verleden. Over de oorzaak van

de verharding van het stedelijke bestaan lijkt

eenstemmigheid te bestaan: de zwakkere sociale controle

in de anonieme stad zou ertoe hebben geleid dat mensen

niet meer weten aan welke regels ze zich moeten houden.

Maar was het vroeger wel vrediger? Dit boek biedt een

antwoord op die vraag door het publieke geweld in de

stad Antwerpen tijdens de eerste helft van de twintigste

eeuw te analyseren.

Post-Colonial Settlement Strategy Ehud Eiran 2019-02-20

Settlement projects are sustained clusters of policies

that allow states to strategically plan, implement and support the permanent transfer of nationals into a territory not under their sovereignty. Ehud Eiran explains why states launch settlement projects into occupied areas and introduces the international environment as an important enabling variable. By drawing comparisons between three such major projects - Israel in the West Bank and Gaza, Morocco in Western Sahara and Indonesia in East-Timor - Ehud Eiran classifies post-colonial settlement projects as a distinct cluster of cases that warrant a different analytical approach to traditional colonial studies. *Cities, Climate Change, and Public Health* Ella Jisun Kim 2020-04-20 To date, climate adaptation has mostly focused on protecting physical assets from potentially catastrophic climatic changes. While the lack of human vulnerability and equity components in adaptation plans and policies has been critiqued by many, this has not yet led to climate adaptation planning and policymaking processes that situates people's health and well-being front and center. This book examines how cities can use a public health frame of climate change to boost people's understanding of and concern about climate change and increase policy support for climate adaptation efforts at the local level. In addition, it aims to strengthen our understanding of different tools cities can use to operationalize a focus on the health implications of climate change, enhance collective decision-making capacities, and, ultimately, build human resilience to climate change.

Nuclear Science Abstracts 1973 NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to

scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.

Climate Change Governance Jörg Knieling 2012-07-30

Climate change is a cause for concern both globally and locally. In order for it to be tackled holistically, its governance is an important topic needing scientific and practical consideration. Climate change governance is an emerging area, and one which is closely related to state and public administrative systems and the behaviour of private actors, including the business sector, as well as the civil society and non-governmental organisations. Questions of climate change governance deal both with mitigation and adaptation whilst at the same time trying to devise effective ways of managing the consequences of these measures across the different sectors. Many books have been produced on general matters related to climate change, such as climate modelling, temperature variations, sea level rise, but, to date, very few publications have addressed the political, economic and social elements of climate change and their links with governance. This book will address this gap.

Furthermore, a particular feature of this book is that it not only presents different perspectives on climate change governance, but it also introduces theoretical approaches and brings these together with practical examples which show how main principles may be implemented in practice.
