**Settler City Limits** Heather Dorries 2019-10-04 While cities like Winnipeg, Minneapolis, Saskatoon, Rapid City, Edmonton, Missoula, Regina, and Tulsa are places where Indigenous marginalization has been most acute, they have also long been sites of Indigenous placemaking and resistance to settler colonialism. Although such cities have been denigrated as "ordinary" or banal in the broader urban literature, they are exceptional sites to study Indigenous resurgence. The urban centres of the continental plains have featured Indigenous housing and food co-operatives, social service agencies, and schools. The American Indian Movement initially developed in Minneapolis in 1968, and Idle No More emerged in Saskatoon in 2013. The editors

and authors of *Settler City Limits*, both Indigenous and settler, address urban struggles involving Anishinaabek, Cree, Creek, Dakota, Flathead, Lakota, and Métis peoples. Collectively, these studies showcase how Indigenous people in the city resist ongoing processes of colonial dispossession and create spaces for themselves and their families. Working at intersections of Indigenous studies, settler colonial studies, urban studies, geography, and sociology, this book examines how the historical and political conditions of settler colonialism have shaped urban development in the Canadian Prairies and American Plains. *Settler City Limits* frames cities as Indigenous spaces and places, both in terms of the historical geographies of the regions in which they are embedded, and with respect to ongoing struggles for land, life, and self-determination.

contemporary writing on the environment largely focuses on doomsday scenarios. Eben Kirksey suggests we reject such apocalyptic thinking and instead find possibilities in the wreckage of ongoing disasters, as symbiotic associations of opportunistic plants, animals, and microbes are flourishing in unexpected places. *Emergent Ecologies* uses artwork and contemporary philosophy to illustrate hopeful opportunities and reframe key problems in conservation biology such as invasive species, extinction, environmental management, and reforestation. Following the flight of capital and nomadic forms of life—through fragmented landscapes of Panama, Costa Rica, and the United States—Kirksey explores how chance encounters, historical accidents, and parasitic invasions have shaped present and future multispecies communities. New generations of thinkers and tinkerers are learning how to care for emergent ecological assemblages—involving frogs,

fungal pathogens, ants, monkeys, people, and plants—by seeding them, nurturing them, protecting them, and ultimately letting go.

Hard Lessons United States.

Office of the Special Inspector

General for Iraq

Reconstruction 2009 Product

Description: The billions of dollars expended in Iraq constitute the largest relief and reconstruction exercise in American history. SIGIR's lessons learned capping report characterizes this effort in four phases (pre-war to ORHA, CPA, post-CPA/Negroponte era, and Khalilzad, Crocker, and the Surge). From this history, SIGIR forwards a series of conclusions and recommendations for Congress to consider when organizing for the next post-conflict reconstruction situation. Over the past five years, the United States has provided nearly fifty billion dollars for the relief and reconstruction of Iraq. This unprecedented rebuilding program, implemented after the March 2003 invasion, was developed to restore Iraq's essential services, build Iraq's security forces, create a market-based economy, and

establish a democratic government--all in pursuit of U.S. interests in a stable and free Iraq. Did the U.S. rebuilding program achieve its objectives? Was the money provided well-spent or wasted? What lessons have we learned from the experience? Hard Lessons: The Iraq Reconstruction Experience, a report from the Special Inspector General for Iraq Reconstruction (SIGIR), answers these and other important questions by presenting a comprehensive history of the U.S. program, chiefly derived from SIGIR's body of extensive oversight work in Iraq, hundreds of interviews with key figures involved with the reconstruction program, and thousands of documents evidencing the reconstruction work that was - or was not - done. The report examines the limited pre-war planning for reconstruction, the shift from a large infrastructure program to a more community-based one, and the success of the Surge in 2007 and beyond. Hard

Lessons concludes that the U.S. government did not have the structure or resources in place to execute the mammoth relief and reconstruction plan it took on in 2003. The lessons learned from this experience create a basis for reviewing

and reforming the U.S. approach to contingency relief and reconstruction operations.
