The Political Ecology of Drylands Sören Köpke 2019-04 As climate change is becoming more severe, drought is threatening to disrupt agrarian societies. This book investigates the connections between drought and social conflict over land and water. It is a comparative study of eight dryland regions in Sub-saharan Africa, South and East Asia and South America. Sören Köpke looks at different agricultural production systems and analyses environmental conflicts linked to drought. Through the political ecology approach, the author highlights the power imbalances underpinning these conflicts. A central finding: Development strategies decide if a conflict escalates or not. The book contributes to the on-going debate on the link between climate change and conflict.

Bill Lambert Samuel J. Wilson 2016-08-16 World War I fighter pilot William C. Lambert of Ironton, Ohio, flew for the British Royal Air Force in 1918. When he left the Western Front in August, he had 22 victories—then the most achieved by any American pilot. (By the time of the Armistice in November, his total was surpassed by Eddie Rickenbacker, the former race car driver from Columbus, Ohio, with 26 victories.) Lambert survived the war and lived into his eighties, unwilling until late in life to seek public acclaim for his war record. This book examines his life and the wartime experiences that defined it.

The Eurasian Way of War David A. Graff 2016-03-10 This book is a comparative study of military practice in Sui-Tang China and the Byzantine Empire between approximately 600 and 700 CE. It covers all aspects of the military art from weapons and battlefield tactics to

logistics, campaign organization, military institutions, and the grand strategy of empire. Whilst not neglecting the many differences between the Chinese and Byzantines, this book highlights the striking similarities in their organizational structures, tactical deployments and above all their extremely cautious approach to warfare. It shows that, contrary to the conventional wisdom positing a straightforward Western way of war and an "Oriental" approach characterized by evasion and trickery, the specifics of Byzantine military practice in the seventh century differed very little from what was known in Tang China. It argues that these similarities cannot be explained by diffusion or shared cultural influences, which were limited, but instead by the need to deal with common problems and confront common enemies, in particular the nomadic peoples of the Eurasian steppes. Overall, this book provides compelling evidence that pragmatic needs may have more influence than deep cultural imperatives in determining a society's "way of war."

New Trends in Neutrosophic Theory and Applications, Volume II Florentin Smarandache Neutrosophic theory and applications have been expanding in all directions at an astonishing rate especially after the introduction the journal entitled "Neutrosophic Sets and Systems". New theories, techniques, algorithms have been rapidly developed. One of the most striking trends in the neutrosophic theory is the hybridization of neutrosophic set with other potential sets such as rough set, bipolar set, soft set, hesitant fuzzy set, etc.

Sustainability Management Rüdiger Hahn 2022-02-11 Driven by mega trends such as climate change, migration, globalization, or population development, sustainable development and sustainability management have now become vital areas of concern for almost all firms. This textbook provides comprehensive knowledge on sustainability management to reduce costs and risks, increase reputation and legitimacy, generate competitive advantages, and advance the sustainable development of companies and society. The book covers not only the concepts of sustainable development and sustainability management but also the relevant instruments and tools used in all essential management domains such as marketing, accounting, supply chain management, innovation management, and many others. Furthermore, this sustainability management textbook employs an extensive stakeholder perspective to illuminate the influence of various actors, such as employees, customers, investors, or governmental/non-governmental organizations. **FEATURES** Faces of sustainability: These features introduce thought leaders in sustainability from all areas of society. - Sustainability in business: These features provide examples of sustainability and unsustainability in business practice from all over the world. Sustainability in business: These features provide examples of sustainability and unsustainability in business practice. Sustainability in society: These features illustrate practical challenges, ideas, and concepts of sustainability from a societal point of view. Sustainability in research: These features give a recap on seminal research articles on different aspects of sustainability management. **ADDITIONAL MATERIAL** The book is supported by an extensive range of online resources for students and course instructors that can be accessed via

<https://sustainabilitymanagementbook.com/> **PRAISE** "One of the leading scholars on sustainable business takes the classroom into the 21st century. A must-read for students, executives, and thought leaders interested in the management of sustainability." Dirk Matten (Schulich School of Business) "This is more than a textbook. It's a handbook for anyone who is interested in sustainability from the most to the least sophisticated." Robert G. Eccles (Founding Chairman of the Sustainability Accounting Standards Board) "A wonderful, timely, and badly needed resource for instructors. The text is both very current and built on a flexible framework. In the dynamic, unfolding field of sustainability management, this is an essential quality." Michael V. Russo (University of Oregon) "The book is highly timely and succeeds in achieving an excellent balance between the big picture of sustainability management and the necessary level of detail. Great help for teachers and students alike!" Minna Halme (Aalto University School of Business) "Finally, a book fully focused on sustainability management! This book gives an excellent overview of the strategic and operational dimensions of making sustainability a reality in contemporary business." Jonatan Pinkse (The University of Manchester) "Cutting edge, innovative, and comprehensive, Rüdiger Hahn sets the standard for the next generation of texts that address the most important challenges facing business

today." Andrew Crane (University of Bath)
"Sustainability management can only be comprehensive when it allows for tensions, and thoroughly considers the perspective of the Global South. This textbook presents the reader with tools to enable them to deal with tensions, and will be helpful to both decision-makers and communities in raising awareness of the importance of diverse perspectives."
