plate boundary zones. Many of the studies reflect advances made possible by the development of space geodetic techniques. Among the topics of the 21 papers are tectonic processes in the Eurasian-African plate boundary zone, the structure of the Dead Sea basin, the January 2001 Bhuj earthquake in India, geological investigations of the Kamchatka region in Russia, and crustal shortening and extension in the central Andes. Nuclear Science Abstracts 1957 NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and

Novel Sensitizing Agents for Therapeutic Anti-EGFR Antibodies Shi Hu 2022-11-25 Novel

Sensitizing Agents for Therapeutic Anti-EGFR Antibodies presents a description of the sensitizers used to overcome resistance to anti-EGFR targeted antibody therapies in cancer, including novel engineered antibody drugs and other sensitizers. The book gives insights into the landscape of anti-EGFR based cancer treatments, the challenges of targeted therapy, and a glimpse into the future of antibody therapy. It offers pertinent science information on strategies used for the rational design and discovery of novel sensitizing agents, and in addition, translational studies involving pre-

clinical and clinical design. This book is an indispensable resource for cancer researchers, medicinal chemists and other biomedical scientists. Finally, the book covers basic science strategies used in drug discovery and preclinical evaluation focused on EGFR blockage resistance, as well as clinical trial methodology, including clinical pharmacokinetics and imaging to address issues of efficacy evaluation of the new anticancer sensitizers for anti-EGFR drug resistance. Presents detailed descriptions on the history, chemistry, mechanism of action, structure-function relationships, pharmacology, side effects, dosing and formulation of new sensitizers to anti-EGFR antibodies Provides molecular structures for all novel anticancer drugs, along with strategies to overcome resistance to anti-EGFR antibodies Encompasses up-to-date information on the cancer drug discovery process, including new research tools, tumor-targeting strategies, and fundamental

The Rise, Decline and Future of the British

Commonwealth K. Srinivasan 2005-11-07 Written by a senior Indian diplomat who has until recently also served as Commonwealth Deputy Secretary-General, this book provides a unique and far-reaching exploration of the British Commonwealth, and its impact since the second World War on the process of Britain adjusting to a world without Empire. Whither the Commonwealth now? What is its record of achievement; what are the benefits of membership to countries in terms of collective political influence, trade, investment, aid, travel and education? Can any practical good be envisaged for this nearly moribund post-colonial organization? Britain, which brought the association into being and is central to it, would have to play a key part in

determining its future. But in coming to such decisions, the British Government faces great problems of perception, both from the Monarchy and the British public.

Vlammenwerper Brandon Sanderson 2016-09-14
Tien jaar geleden verscheen Calamity aan de hemel en ontwikkelden sommige mensen ineens bijzondere krachten. Deze zogeheten 'Epics' kregen niet alleen een gave, maar ook een onstilbare honger naar macht en destructie. Niemand durft de Epics een strobreed in de weg te leggen. Niemand, behalve de Wrekers. Die geheimzinnige groep heeft al meerdere onverslaanbaar geachte Epics uitgeschakeld. David wil de Hoge Epic Vlammenwerper opsporen. Het gerucht gaat dat die in Babylar is, het voormalige Manhattan. Babylar wordt geregeerd door de mysterieuze Regalia. Het binnendringen van een stad onder het juk van een
