het restaurant van hun verzorgingstehuis. Terwijl de flessen wijn op tafel komen hopen Joyce, Ibrahim en Ron dat Elizabeth een nieuwe cold case voor ze heeft – een moordzaak die ze als amateurspeurders kunnen gaan oplossen. Elizabeth is er echter met haar hoofd niet bij. Ze heeft een brief ontvangen, ondertekend door ene Marcus Carmichael. Dat is verrassend, want de laatste keer dat Elizabeth hem zag was in 1981, toen hij morsdood onder een brug lag. De brief blijkt te zijn gestuurd door Douglas, een voormalige echtgenoot van Elizabeth. Hij werkt voor de Engelse inlichtingendienst mi5

en is op de vlucht voor de maffia, vanwege een akkefietje met 20 miljoen pond aan gestolen diamanten, maar voordat ze hem kunnen helpen wordt Douglas vermoord. De vier bejaarde speurneuzen zijn nu zelf het doelwit. Slagen erin ze de diamanten op te sporen voordat de moordenaar hen uit de weg laat ruimen?

Marx's Discourse with Hegel N. Levine 2012-02-21 The end of Stalinist Russia, China's change under Deng Xiaoping and the publication of previously unexplored documents of Marx in the MEGA2 opened a new epoch in the analysis of Marx. *Marx's Discourse With Hegel* is both a product and contribution

to this rebirth of Marxism by its reformulation of the relationship between Hegel and Marx

1997 This is a practical guide

for project managers who are

planning a career in the

commercial and public sectors.

The authors examine the

human side of project

management and look beyond

the tools and techniques to the

key relationship between the

sponsor and the project

manager. The book looks beyond network analysis to the human and managerial issues of professional project work. It draws attention to the development of key management skills such as negotiation, communication, leadership, organization and group dynamics. The book is illustrated with examples and illustrations from the authors work over the last 30 years as consultants and project managers.

Metals and Genetics
Bibudhendra Sarkar 2012-12-06
During the past few years,
major scientific discoveries have
greatly contributed to our
understanding of the
relationship between metals and
genetics. The fields which have
contributed to this area range
from Clinical Medicine and
Genetics to Biochemistry and

Chemistry. The aim of this book
is to bring together investigators
from these diverse fields to
reflect on the broad implications
of direct and indirect
interactions of metals and
genetic components. The
volume begins with a tribute to
the late Karen Wetterhahn, an
outstanding scientist in the
field, who will be sadly missed
by her friends and colleagues
because of her untimely death.
The book has 28 chapters
contributed by scientists who
are internationally known for
their expertise and outstanding
research. The subject matters
are divided into five major
sections. The first section
discusses genetic response to

environmental exposure to metals. Potentially devastating health crises have been reported in recent years from several parts of the world, which stem from environmental exposure to metals. In this section, authors report their findings on the effects and influence of metals in gene expression and their consequences to human health. The section on metal carcinogenesis and metal caused DNA damage, presents the latest advances in our knowledge of the molecular mechanisms of metal-induced mutagenesis and carcinogenesis. This topic is at the very heart of our

understanding of how cancer may be caused by various metals.
